AMENDMENT TO FORM 470 # 180006684

This document amends the sections listed below. These changes are considered non-substantive by USAC:

2.2 PHYSICAL LOCATION:

The District requests that Vendors list separately the construction costs associated with pulling fiber at the first location (25 Alumni Drive).

2.7 PROJECT CONSTRAINTS:

The District has come up with an alternate solution that eliminates this project constraint. Should the conduit freeze, the District is willing to wait until it thaws to have fiber pulled through this conduit.
